

# Pavel Yaumenau

C++ Developer

## Hello, I'm Pavel.

I can quickly switch to a different tasks and concentrate on new tasks.  
I can easily explain complicated things to people in plain language.  
I am rapidly concentrating on new tasks related to the elaboration of requirements for a future solution.  
I quickly find common ground with team members and stakeholders.

## CONTACT

## EXPERIENCE

- C++ DEVELOPER**  
Jan 2019 - Jun 2021  
**China Electronics Technology Group Corporation**  
Developed and implemented monitoring and sniffing modules for cross-platform of Linux, Windows, Unix (VxWorks), thanks to which they controlled the state of the remote machine, the operation of processes and the transmission of packets; Created an UI interface for displaying the receiving data from modules.  
I reworked the logic and architecture on the client part of the deployment, for deploying the project on remote machines.  
I rewrote the code from Boost to POCO C++ Libraries, since the POCO library is written in C++98.
- SOFTWARE ENGINEER**  
Aug 2017 - Jun 2019  
**Gymnasium №24**  
I developed and implemented a JavaScript script in the CMS system "Web.Perspective" for user feedback.  
Optimized site upload time, which is an order of magnitude better than before by 0.6 seconds.  
I have implemented cloud storage for better document exchange.  
I connected new workstations to a local network and to the cloud storage.
- C++ DEVELOPER**  
Mar 2016 - Dec 2018  
**Freelance**  
I designed lab work, course and diploma projects to be customized.  
I improved my skills in the C++ programming language, using 98 and the 11th standard, writing SQL queries, working with Git.

## EDUCATION

- INFORMATION TECHNOLOGY SOFTWARE**  
Set 2015 - Jan 2019  
**Belarusian State University of Informatics and Radioelectronics**  
Diploma projects: Cross-platform software tool for remote administration in a local network using client-server technology:  
C++, Qt, TCP/IP, WinAPI, LinuxAPI.
- INFORMATION TECHNOLOGY SOFTWARE**  
Set 2012 - Jun 2015  
**Gomel Trade and Economic College**  
Diploma projects: Software tool for remote administration in a local network using client-server technology:  
C++, WinAPI, TCP/IP.
